COMMENTS ON SPORTS

By Pete Fritchie
Baseball

Washington, D. C.- The hottest question in baseball now is whether the New York Yankees have had it. The Yankees moved as if they were heading for the top of their league in early May but soon began to stumble and then lost nine out of twelve.

It was not surprising that they could manage only a split with first-place Detroit, even in New York, for the Tigers have long been the nemesis of Yankees. What surprised us was the sweep of a two-game set from New York by Cleveland; they are not the Yanks of old.

And this seemed to set Cleveland on fire. The Indians, who started poorly, caught fire and made moves of fighting it out with Detroit and others for the pennant.

Detroit of course has a lot of games to play before the Tigers can say they belong up there, as pennant contenders. But they have impressed observers so far even though Boston recently became the first team to win a series from the Bengals.

Detroit's pitching will be the key. The Tigers have good power but much of it is rookie power and it could be only a one - year sensation. Frank Larry, Don Mossie, the rookie surprise, Regan, and Jim Bunning must consistently win. Paul Foytack could take up the slack, if Bunning or Regan falters, or if Lary or Mossi are hurt.

Cleveland suddenly has a hot pitching staff - Perzy (the best) Grant, Hawkins, Bell, Funk and others. The Indians have good power and they could be taught especially if they pepped up by a Yankee collapse. But if the Yankees come on they will probably roll over the Indians, as usual.

Chicago seems much weaker this year, but Al Lopez may yet get into it Judging him from last year's tough null, however, he lacks the punch. Minnesota might have been a contender this year -still might - but the Twins haven't yet begun to click with bats.

TOBACCO SPACING TIPS LISTED

Proper spacing of the tobacco crop has a lot to do with yields and profits.

Tobacco specialists at Virginia Polytecnic Institute have these timely tips for growers who are soon to move plants from the bed to the field:

For burley tobacco, space plants 16 to 18 inches apart in rows 3½ feet apart. The 18 inch spacing will give a plant population of about 8,300 plants - the best number. Growers who plan to make one or two primings should space rows 4 feet apart, with plants 16 inches apart in the row.

For fire-cured and sun-cured tobacco, space plants 30 inches apart in rows 3½ feet apart. This spacing will provide about 5,000 plants per acre.

For flue-cured tobacco, use rows from 42 inches to 4 feet apart. The 4 foot rows are better if horse-drawn slides are to be used between rows. Space plants to get a plant population of from 6,000 to 6,500 plants per acre. For instance if row spacing is 42 inches, put plants 24 inches apart in the row. If row spacing is 44 or 48 inches, put plants 22 inches apart in the row. If more than 6,500 plants are set per acre you will need more labor to transplant, harvect, and grade, and often you will sacrifice quality.

FIRE DESTROYS HOME

A fire of unknown origin destroyed the home of Mr. and Mrs. Walter Williams, about three miles from Pamplin on Wednesday night recently. They had almost completely remodeled the house. The old kitchen and dining room had been moved a good ways from the rest of the house, and a new kitchen, bedroom and bath added to the house. The cabinets of knotty pine had been installed. All this was a total loss. The outside had just been finished all over the house, with shingles, at 3 P. M.

Neighbors and friends have been helping them all they can since the fire. The family, which consists of Mr. and Mrs. Williams, two sons, Floyd and Edward, and Mr. Tom Watson, Mrs. Williams father, are staying with Mrs. Alvin Price at Pamplin. The two rooms that were moved still have the old kitchen things, so that is a help, too.

FHA LOANS NOT CONFINED TO FAMILY-TYPE OPERATORS

Farmers Home Administration loans can be made to farmers who are conducting less than family-type farm operations. These loans include funds for operating and for capital goods expenses.

Farm Housing loans can be made to farm families for the construction or repair of essential buildings regardless of the size of operations except that the farm must produce at least $400 worth of farm commodities per year. This type of loan can have a repayment period up to 33 years.

Information on these and other type of loans made by the Farmers Home Administration can be obtained from the FHA unit office located at Farmville, Hunter P. Evans is county supervisor. Mr. Evans also has part-time office hours at Appomattox at the ASC office Tuesday mornings from 9:00 to 9:30.

GAME WARDENS SHOW INCREASED ACTIVITY

Field personal of the Virginia Game Commission found themselves busy as warmer weather arrived in the Old Dominion, according to monthly reports from the Commission's law enforcement and game divisions.

State game wardens reported a total of 503 convictions for violation of game, fish, migratory bird and boat laws during April.

Personnel in the Commission's game division devoted March to spring planting of wildlife food and cover plants, creation of wildlife clearings, and surveying of boundary lines on the Commission-owned Gathright and Wunder Wildlife Management Areas. Game Division personal cooperated with fish divison men in trout stocking and the patrolling of mountain streams during the month.

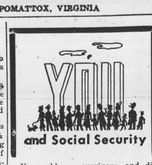
State Game Warden Fred W. Hottle of Edinburg lead the warden force with 28 convictions for violations of game, and boat laws in April for a total of $570.50 in fines and costs.

State game warden arrests resulted in a total of 74 game, 357 fish, 13 migratory bird, 59 boat, and 174 dog law convictions. Total fines and cost in April were $12,359.45.

17 Years Late

Portland, Maine.- A Bronze Star medal for heroism 17 years ago in the Second World War has just been received by John R. Forbes, of Portland. The army gave no explanation of the delay.

Good farmers are those preparing to live at home.



Your old-age survivors and disability insurance system is self-supporting through social security taxes and interest on its trust funds.

If you have wondered what your contributions have been, based on maximum wages from 1937 to 1960 inclusive as an employee, this amount would be $1290. Your employer has contributed the same amount. This makes a total contribution of $2580. Your wages over this period would have been $82,800.

These contributions, not only from employees but also from self-employed persons, make up the trust funds. Monies not being used to pay for benefits to retired workers, survivors and disabled people are placed in the trust funds and invested in U. S. Government securities. The interest from the investment is added to the reserve fund. Interest now being received is much greater than the total administrative expense of operating old-age and survivors insurance.

Social Security is not something for nothing. In the long run the value of worker's contributions will just about equal what he will get back in payments. In the meantime, he has had not only protection against possible death but also disability protection.

At present the trust fund has a balance of about 22 billion dollars, with interest on securities being over one half billion a year. This, along with future income from covered workers, is expected to be sufficient to meet future disbursements.
